Tunebug[®] Shake[™]

SurfaceSound

Tunebug's patented SurfaceSound Technology lets sound waves pass through the surfaces it rests on turning many 3-dimensional surfaces—such as a sports helmet—into an audio speaker.

Surround Sound on your Head

Mobile music typically means listening through headphones, dangerously isolating yourself from others and your environment. The Tunebug Shake is an ultra-portable sound generator that can be connected to iPods, MP3 players or mobile phones or used wirelessly using Bluetooth technology. When mounted on a bike, skate or snowboard helmet, the Shake turns that helmet into a speaker.

- Ultra-portable and lightweight
- Mounts to most types of helmets
- Rubber molded grip and water resistant
- Touch-sensitive on/off and volume up/down control

Specifications

Size And Weight
Dimensions: 2.2 x 0.90in (55.9 x 22.9mm)
Weight: 2.53oz (72g)

Power And Battery
Battery type: LiPoly (450mAh)
Playtime: 5 hours

Connectivity
3.5mm Audio Cable
Bluetooth Wireless Technology

Includes
3ft USB Charge Cable
3ft 3.5mm Audio Cable
TuneStrap and Gecko Mount Harnesses
